

Repeated String

Lilah has a string, s , of lowercase English letters that she repeated infinitely many times.

Given an integer, n , find and print the number of letter **a**'s in the first n letters of Lilah's infinite string.

Input Format

The first line contains a single string, s .

The second line contains an integer, n .

Constraints

- $1 \leq |s| \leq 100$
- $1 \leq n \leq 10^{12}$
- For 25% of the test cases, $n \leq 10^6$.

Output Format

Print a single integer denoting the number of letter **a**'s in the first n letters of the infinite string created by repeating s infinitely many times.

Sample Input 0

```
aba
10
```

Sample Output 0

```
7
```

Explanation 0

The first $n = 10$ letters of the infinite string are **abaabaabaa**. Because there are 7 **a**'s, we print 7 on a new line.

Sample Input 1

```
a
1000000000000
```

Sample Output 1

```
1000000000000
```

Explanation 1

Because all of the first $n = 1000000000000$ letters of the infinite string are **a**, we print 1000000000000 on a new line.
